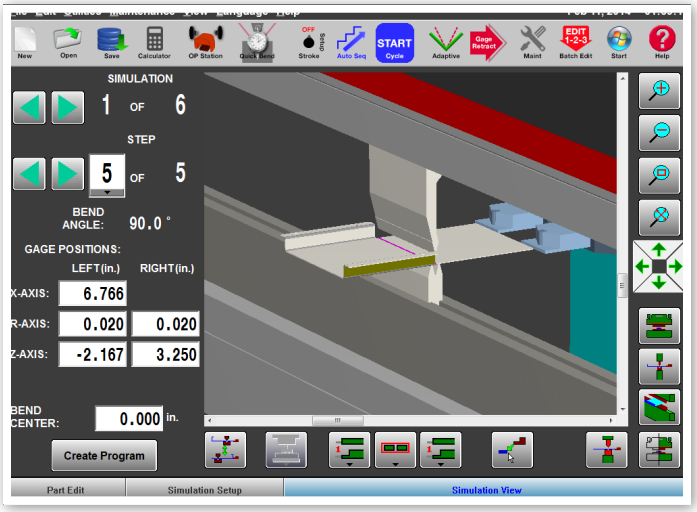
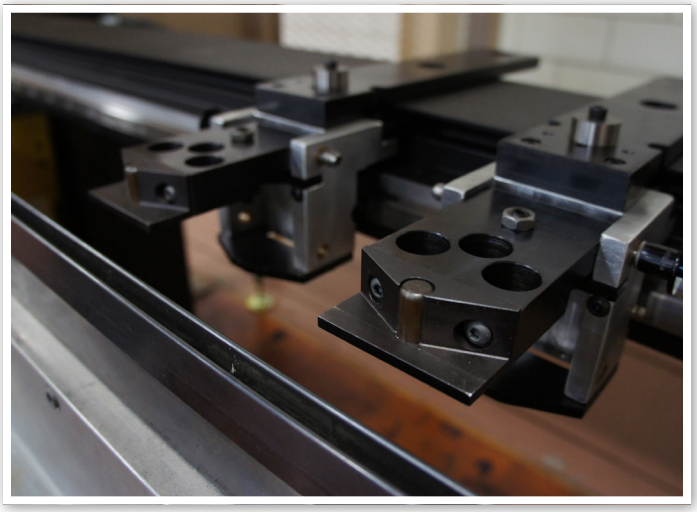
PRESS BRAKE UPGRADE OPTIONS

Below is a list of options that can be upgraded on your press brake to improve its productivity.

For more information visit: www.e-ci.com/pressbrakeupgrades





PRESS BRAKE CONTROL RETROFIT

A touchscreen control can be retrofitted to your CINCINNATI press brake at an affordable cost. The addition of this new control is a cost effective way of improving productivity in your forming operation, resulting in lower cost per part.

Control Retrofit includes the following:

- Installation of the new touchscreen control by Cincinnati Service Representatives
- Control demonstration.
- 1 Year Parts and Labor Warranty

CONTROLRETROFIT

PRESS BRAKE BACKGAGE UPGRADE

With a press brake control retrofit, you can also upgrade to a 5-axis backgage. This offers another productivity enhancement that reduces setup times and allows for complex part gaging. The powerful 1-2 combo of both upgrades will give your already durable and accurate CI press brake many more years of service.

Backgage upgrades include the following:

- Installation of a new 5-axis backgage
- A limited Planned Maintenance Service inspection on the CINCINNATI Press Brake
- Backgage demonstration
- One-year parts and labor warranty
